

# Yellow Marguerite Daisy

*Argyranthemum*

Placement: Full Sun

Planting: Use in containers, as a specimen planting, and in the landscape. A strong upright marguerite daisy that adds all-summer color to any garden.

Watering: Maintain soil moisture, moist but not soggy.

Feeding: Fertilize every two weeks in container plantings and once a month in landscape plantings. Use a well-balanced fertilizer high in nitrogen.

Pruning: Although not required, deadheading improves continuous bloom. May be pruned for height control if desired.

Spacing: 12-14 inches

Height: 2 feet
