

# Cardinal Climber

*Ipomoea x multifida*

Vigorous twining vine reaches 15 to 20 feet!

Brilliant blooms from early summer till frost on this vigorous, giant twining vine! The huge foliage is so elegantly divided, and it makes a spectacular backdrop for the radiant 1-inch scarlet blooms. These tubular flowers face up and out from the foliage for a full color show--the perfect accent for gates, poles, and any other structure enabling this 15- to 20-foot vine to twine with unrestrained glory! The foliage is so striking that even when not in bloom, it is a handsome addition to the garden.

Very easy to grow in full sun.

4" pot 10 oz. (295ml)
