

# Dichondra Silver Falls

Velvety Silver Leaves Cascade up to 6 Feet Long!

Perfect for hanging baskets or stunning ground cover in the garden!

Vigorous and easy to grow, this Dichondra is simply one of the showiest accents around for all your containers and bare garden spots.

Its leaves have a thick, super-soft texture and neat fan shape, measuring about 3/4- to 1-inch long and wide. They arise profusely on very well-branched plants that need no pinching. Before you know it, this cascading beauty will be 3 to 6 feet long, though never more than about 3 inches tall! Very heat- and drought-tolerant, Silver Falls recovers quickly even if wilted, and looks fresh all season long. Silver Falls thrives in full sun and well-drained soil.

4.5" pot 1.62 pt (766ml)
