

New! Easy Wave Salmon

The breeding company of the famous Wave Series also brings us the Easy Waves. Although a spreading petunia, its habit is more mounded than the Waves, a bit less spreading, and will maintain a nice crown throughout the growing season. Garden habit will be approximately **8 to 12" high with a 2-1/2 to 3 ft. spread**. They are earlier to flower under short days than the Waves, and still fill out a garden bed or basket very well. Overall, this is an excellent new series for baskets, containers and small space gardens.
