

Eucalyptus

Eucalyptus cinerea

Fast-growing; prune to desired height

Soft Silver-Blue Color and Unusual Foliage!

Round, silvery leaves are pierced through the center and held out horizontally on long, stiff stems!

A treat indoors or out, this exquisite Eucalyptus is a study in color and texture. The round, very flat silvery-blue leaves are held in pairs along stiff stems of the same color, giving the plant a very neat, layered look. Fabulous as an Everlasting!

A native of Australia, Silver Dollar Plant is at home in warm climates or indoors, and can be pruned to desired height. In the sunny garden, it grows rapidly but is not invasive. To dry, simply cut the stem at the desired height and hang it upside-down in a well-ventilated, dry, somewhat cool location.
