

Morning Glory Minibar Rose

Beautiful Blooms and Ivy-Like Variegated Foliage!
The small green-and-white leaves look like miniature ivy!

A very different Morning Glory, Minibar Rose produces both lovely flowers and distinctive foliage. Its blooms are rosy-crimson with a white throat and occasionally a star pattern or even a picotee--they arise abundantly all over this dense, eager-to-grow trailing vine. The foliage is very attractive, resembling miniature ivy with small, heart-shaped green-and-white leaves. The smaller proportions and attractive combination of bloom and leaf make this Morning Glory the best choice for baskets, or to tumble over walls in a mass planting. Striking and distinctive!
