

# Ornamental Millet Purple Majesty Hybrid

Ideal for bedding, border, and edging!

4 to 5 feet tall and boasting flowerstalks a full 12 to 14 inches long all summer, Purple Majesty is easy to direct-sow or to begin indoors (where it will remain green until you expose it to full, direct sunshine). It thrives in high heat and unremitting sun, so grow it alongside the blazing driveway, in the foundation border, along the fence, or at the back of the patio near a warm wall.

Virtually untroubled by pests and disease, it grows quickly, with several main stems and secondary shoots all sporting blooms in summer. Space plants about 10 to 12 inches apart for a thick, even line of unbelievable color!
