

Persian Shield

Strobilanthes dyerianus

Exposure: Shade to Partial Shade

General Information: Persian Shield is a low growing herbaceous shrub native to Burma. When new, the leaves have an 'aluminum' color cast. Grow in moist, well-drained soil, shade, and high humidity. Prune to achieve a more compact appearance, as well as more color as a result of new foliage growth. Purple blooms may be a possibility in desirable growing conditions.

3 pack 13.8 oz. (408ml) cell 4.6oz. (136ml)
