

Petunia Wave™ Blue

Just 9 plants cover more than 100 square feet!

The Best Color Yet -- and Winner of Top International Honors!
Low, Wide, Ultra-Colorful Ground Cover! Perfect for Baskets!

This spreading Petunia is just stunning in baskets, planters, windowboxes, and the garden, where it spreads along the ground like crazy! A very rare and desirable color on a floriferous, weather-tough plant!

Its spreading habit is just stunning, covering ground at the rate of several inches every single day, and trailing lots of colorful 2- to 2 1/4-inch blooms as it goes! Blue has the same incredible bloom and spread of the other Waves, coupled with a densely-branched habit about 6 inches tall and 3 to 4 feet wide.
