

Summer Poinsettia

Aurora

Amaranthus tricolor

Glow in the back of the border or among green shrubs!

Like a golden crown, these tall, stately plants sport a dense starburst of yellow foliage held right at the top of each stalk! The plant reaches 4 feet tall and 2 feet wide, with the “crown” occupying the upper $\frac{1}{4}$ to $\frac{1}{3}$. Beneath it, the foliage is narrow, bright green and staplelike. Aurora creates a sensation wherever it is planted, and is particularly effective in the back of the border or as a stunning hedge. The brilliant gold color begins in mid-summer and continues into fall until first frost.
