

Alyssum Snow Crystals

With a sweet scent that wakens the arrival of spring to the sunny garden, Snow Crystals is a dazzling pure-white Alyssum you will love. Performing even more reliably in the garden than other Alyssums, this neatly-mounded plant grows just 4 inches tall but spreads 8 to 10 inches wide, every inch occupied by tiny white blooms or small fresh green foliage. Perfect as edging or ground cover. Snow Crystals is also superb in the bed or planter, offering easy-care color and fragrance all season long. For even more blooms, keep the plant trimmed back and remove spent flowers. Plant in **Sun**.

Pack of 4 - 12 oz. (354ml)
cell - 3 oz. (89ml)
