

Cleome Spider Mix

This mix contains all 4 Queen series blooms: cherry-rose, vivid pink, clear white, and soft violet! Each bloom is just 1 inch long, but they arise profusely in loosely-held, ball-shaped clusters that perch atop stately 3- to 4-foot-tall stalks. New blooms open every afternoon, and are so thin and delicately-held that they have earned the common name "Spider Flower!" Excellent contrast to the dense, lush, pointed dark green foliage. And they bloom profusely from early summer all the way to frost in full sun!
