

Better Bush

68 days. If you're looking for an old-fashioned-flavored tomato with the juiciness and distinctive "tang" you remember from vine-fresh tomatoes of the past, Better Bush Improved Hybrid is the best choice. These big, luscious, 4-inch fruits grow very densely on indeterminate 4-foot plants, thanks to shorter internodes. The central stem rarely needs staking (except during those "bumper crop" times!), and this plant begins early in the season and just keeps going! This is a superbly garden-worthy variety with great yields of ultra-satisfying fruits. Resistant to Verticillium Wilt and Fusarium Wilt Race 1.
