

# Patio

70 days. The University of Florida developed this variety just for the home garden, with a compact habit ideal for containers, patio culture, or small-space gardening. It's a great combination of big fruit on small plants, and is as stunning as an ornamental as it is delicious!

The big, bright red, smooth-skinned fruits weigh between 8 and 12 ounces each, measuring 3 1/2 to 4 inches in diameter. They are firm and crack-resistant, with good uniform coloring and terrific juicy-sweet taste.
