

# Habanero

95 days. This family is the hottest of the hot, *Capsicum chinense*, reportedly 1,000 times hotter than Jalapeno. Native to the Yucatan, 1" by 1-1/2" lantern-shaped pods, with thin, wrinkled, light green flesh, ripen to a golden-orange. Slow to germinate, must be grown in warm, moist conditions.

Plants grow 36" tall.
